

Latest Research Results on Corona Vaccinations Excerpt from the 798th contact of Saturday, 2nd of April 2022

Billy ... You said that you had something very important to report and that it was not only a concern for us in the KG, but also for the FIGU passive members and even for the whole of humanity.

Bermunda Yes, that is right. – Several attempts have been made to ascertain the origin of the rampantly spreading corona disease, but the ventures that took place to fathom the rampantly spreading disease always ended miserably with the claim that the origin of the rampantly spreading disease had been found, and that it had most certainly found its way to the human beings through bats. This claim still exists today, but it is untenable because the true origin is effectively based on laboratory work by a few men, well rewarded for the rest of their lives, who allowed themselves to be financially bought at a young age for the hatred of two individuals and were able to create the dangerous corona virus. But those persons who were and still are concerned with the supposed 'clarification' and 'elucidation' of the corona origin do not want this to be true and do not want to accept it.

What also needs to be mentioned is that this artificially human-made virus has particular created characteristics that viruses cannot acquire and develop naturally.

Initially there were 16 of these individuals, but 11 of them died in the course of the years. But the last 5 who were still alive and already very old created the virus after all and released it, however, unwantedly as a result of imprudence, which also cost them their lives. Therefore, none of these people is still alive, because the last one died in January 2020. However, before they all departed this life, they destroyed the laboratories and their facilities and equipment, and so forth.

What resulted from all this is just as familiar to you as what I have now concisely told you. However, what Ptaah already explained to you more than two years ago, our research has now proven to be the effective truth, namely that various corporations and companies specialising in pharmaceutical products hoped for huge profit if they were able to intervene as quickly as possible with pharmaceutical remedies against the pandemic and convey safety through big promises. This was an idea that was quickly taken up and implemented in reality, namely by propagating vaccines that, according to lies and fraudulent claims, were supposed to be effective against the rampantly spreading corona disease. However, by no means was a word of it true, for the vaccines propagated were nothing more than placebo products, some of which consisted only of distilled water, while others contained medicinal active substances which, however, had not been tried and tested in any form to determine whether or not they were suitable for vaccination against the rampantly spreading corona disease. In reality, however, there was no efficacy at all against the virus, so the lie of 90 or 95 percent efficacy was only a lie and a dangerous fraud, which brought death to many Earth human beings, because the mixtures of the vaccines have brought and still bring death to many human beings. Truthly, our research – and I am speaking expressly of the laboratory research results, which are much more precise than anything that is elicited on Earth by means of primitive devices – that we have been doing on Erra since November 2019, has shown that of the supposed 90 to 95 per cent efficacy, as claimed by the Earthly pharmaceutical companies, only 16 to 23 per cent of the various supposed vaccines contain elements that may work against the rampantly spreading corona disease, depending on the production – expressly said, **may** work. In many cases, the so-called vaccines are not only unusable; on the contrary, some of them are even life-threatening, whereas the virus itself, the infection and the disease itself are less dangerous than one of these vaccines, consequently for many human beings the better way is not to be vaccinated in order to overcome everything and not to fall victim to death, or to have to suffer lifelong ailments due to the inadequate vaccines. Depending on the state of the immune system, the human being of Earth is more susceptible to or more protected against the attack of the virus, so that with regard to an infection by this virus, the effectively given momentary state of health is determining.

The development of a vaccine that is really useful and applicable with a clear conscience and that counteracts the pathogen requires a long time, and indeed years during which it is researched and developed. As a rule, this takes at least 10 to 15 years. However, under some circumstances further continual research is still required for adjustment if a pathogen mutates, as is the case with the corona virus.

What is further to be said according to the results that our research has yielded since November 2019 until a few days ago, therefore within 2 years and a few months, allowed these cognitions and aspects to come about that life-endangering and consciously life-destroying felonious action was taken on Earth through the application of untried and strongly adverse vaccines – in which case it must be taken into consideration

that our research modularity with regard to the fathoming of chemistry and medicine, and so forth, is much more advanced, more knowledgeable, as well as more extensively developed than any of those by the Earth human beings. And the whole of the felonious acting of the corporations and companies in this respect, who quite consciously released such vaccination products, which were supposed to prevent an infection by the corona virus, but from the very beginning were completely ineffective and, as the case may be, even life-threatening, claimed many human lives, consequently many of those who were willing to be vaccinated died in all countries of the Earth through the vaccines. Truthly, these were indeed totally ineffective against any possible infection of a rampantly spreading corona disease mutation, however, they were helpful and offered a supposed protection for those who could say that they had a perfectly good immune system, or for those human beings who were able to overcome their anxiety by getting vaccinated – which, however, in many cases ended their lives within a short period of time.

What has been said is only part of the whole, because furthermore, the results of our research revealed that both the ever-mutating corona virus itself, as well as the feloniously used vaccines, can cause long-term health damage from the rampantly spreading disease or from vaccination. Thus, our researchers fathomed results of long-term effects through which continuous ailments appear already shortly after the vaccination – if no deadly consequence occurs – which can be short-lasting or even lifelong. Even in later years, after-effects can get very badly out of control and pervert into illnesses that can lead to cancer, brain damage, respiratory damage and physical disabilities, and so forth, the origins of which 1. cannot be fathomed and 2. also cannot be healed. Men can become incapable of procreation or produce offspring afflicted with damage, while women can lose their ability to conceive, have stillbirths or give birth to sick and suffering descendants. All this is possible, among other things, due to the irresponsible vaccination with untested vaccines that are ineffective to a large extent and partly life-threatening, however, also due to an infection and illness caused by the rampantly spreading corona disease. And so that this can happen and that that which has been said will be carried into the future, the national leaders contribute everything to this, who with their confused and conscienceless orders as a result of their incapability, very quickly and irresponsibly aided and abetted the felonious machinations of the pharmaceutical corporations and pharmaceutical companies, who did everything conceivable felonious in order to secure their profits and to boost them to heights that they would otherwise never have achieved.

All this is what was to be said today in plain terms, what Ptaah ordered, what our precise research revealed a few days ago, which, however, leads even further than that which I have passed on. It should also be explained that I am not an expert in this field of research, therefore I cannot speak in the technical language in the form in which everything had been explained to me. For the most part, I have only mentioned in my words that which is the fact of the whole matter.

Now, in order to say that which is Ptaah's concern, I will name the 7 things of importance he mentioned, which he advisingly deems necessary, and which I will put into the following words:

First and foremost, wearing an FFP2 respiratory protection mask is the only effective means of protecting oneself against the rampantly spreading corona disease and all its mutations. This is actually the only protection at present and for some time to come against the corona virus, which can appear anywhere and unexpectedly where human beings recklessly walk around without protective masks.

2. It is easier to become infected by the rampantly spreading disease and overcome it as an illness and recover, than to rely on doubtful vaccines, many of which are of such a kind that they bear the risk of deadly consequences.

3. To protect oneself against the corona virus, that is to say, against the rampantly spreading corona disease, means: Wearing an FFP2 respiratory protection mask alone ensures a certain degree of safety against infection by the corona virus in contact with fellow human beings.

4. However, it is very important to consider that even the correct wearing of a respiratory protection mask is of great relevance, consequently the mouth as well as the nose must be covered by it in such a form that no oral or nasal fluid can leak out of the mask. This is only possible to a certain extent if the mask is worn tightly and in such a form that it covers at least half the length of the nose. When inhaling, the air normally passes through the nose and via the windpipe into the respiratory tract and thus into the lungs. Nasal breathing ensures that the inhaled air is normally cleaned, moistened and also warmed

by the hairs and mucous membranes in the nose, hence it is absorbed by the lungs unnoticed by the human being. However, if it is infected by any pathogens, these likewise reach the lungs in the same way, unnoticeable for the human being, and from there they infect the organism without hindrance.

5. Even the wearing of a respiratory protection mask does not offer full security against an infection from the corona virus, because under some circumstances, due to carelessness, it can happen that the virus still finds way into the respiratory passages or swallowing tract due to some circumstances, in which case an infection inevitably occurs and the rampantly spreading disease infects the organs and thus the organism accordingly falls ill.

6. A complex process takes place in the mouth, which normally transports food and saliva from the oral cavity to the stomach, which, however, makes normal swallowing movements every day even without food consumption. The saliva accumulating in the mouth and moreover irritations of the base of the tongue involuntary triggers the swallowing reflex, which causes the swallowing movements to occur without willing influence. In the case of an infection, the virus enters the oral cavity, then the throat, further into the oesophagus and finally into the stomach, and consequently the whole organism is ultimately contaminated with the virus.

7. Eventually it is also necessary, in order to protect oneself against an infection from the corona virus – which indeed can only be an FFP2 respiratory protection mask without an exhalation valve in order to protect not only oneself, but under some circumstances also the fellow human beings from an infection – thus in addition to the correct wearing of a suitable respiratory mask, it is urgently required that a certain safety distance from the next one is maintained, if there is not a high degree of certainty that this one is free from the corona virus pathogen.

This is that which Ptaah is saying and is also very concerned about, because the whole of the state ordinances regarding the general abrogation of protective measures is being done too early. Furthermore, he mentioned that he cannot understand that the majority of the respective populations are acting irresponsibly in such a form that such human beings are elected and admitted to the leaderships of the countries who would issue such senselessnesses and, moreover, harmful directives for the respective populations, which are devoid of intellect and any rationality.
