FIGU INTERESSENGRUPPE FÜR MISSIONSWISSEN ENGLAND

ISSUE NR. 5

Info Stand - Cambridge FIGU England Info Stands

We carried out multiple info stands as usual in Cambridge. 2025 was not different. We organized 3 Info stands in Cambridge during 2025. A lot of interesting moments and photographs.

Member Interviews 8 Questions and Answers

Group members answered 8 questions related to the Creation Energy Teaching. Great insights, interesting questions and answers from the FIGU England Group.

Group visits Switzerland Group work at SSSC

In 2025, our FIGU England Team visited the SSSC in Switzerland. We had a great time during our Group work. We can't wait to visit the Center again in 2026.

INFO STAND - CAMBRIDGE

We organized multiple Info Stands as usual in Cambridge. 2025 was no different. During all three Info Stands in Cambridge this year, people had the opportunity to speak to us and receive more information about FIGU. We had a lot of interesting moments.

Upcoming Info Stands in Cambridge during 2026:

1. 30.05.2026 - Saturday
2. 27.06.2026 - Saturday
3. 25.07.2026 - Saturday

SECOND ANNUAL MEETING SEPTEMBER 2024

Pictured above Left to right - Yunal Berk, Aleks Pogroszewski, Greg Cherifi, Karl Beaney

Group visits Switzerland

Group work at SSSC

During 2025 our FIGU England Team visited SSSC in Switzerland. We had a great time during our Group work. We can't wait to visit the SSSC again in 2026.

It was good to see Billy in person and some of the Core and Passive Group Members.

We are looking forward to visiting the Semjase Silver Star Center in 2026.

Pictured above are Group Members Left to right: Yunal Berk, Ketih Davidson, Karl Beaney

MEMBER INTERVIEW - Jonathan Steven.

All our group members answered 8 questions related to the Creation Energy Teaching. Great insights, interesting questions and answers from all of us from FIGU England.

Q1 - If you could time travel what would you want to say to the most recent previous incarnation of your spirit form and / or to your immediate next future incarnation? As an accomplished time traveler, you can pick any age of their life to visit (and assume a timeline where no mishaps have unnaturally shortened their life).

Answer

To my previous self I would say: "You have a brain - use it. Make good decisions. If circumstances allow, don't make a decision in the heat of the moment when you're full of emotion. Take your time, reflect, sleep on it and make the call based on logic, a clear head and focused on what you want to achieve."

To my future self I would probably use the conversation as a learning opportunity on the assumption that my spirit form would be more evolved at this point so I would probably ask my future self if he (or she) had any advice for me.

Q2 - What do you find most interesting about the Plejaren and their culture and why?

Answer

Having spent my adult life living mostly in England and to a lesser extent in Canada, I'm used to a democracy-based style of social governance where we elect our leaders at regular intervals. The idea being that if we don't like someone and what they're doing for our country then we can vote them out in favour of someone who's personality and agenda is more aligned to what we do want for ourselves and our country. On Erra (the Plejaren home world) each plejaren contributes towards and shapes the future of their society through societal engagement and reasoned, logical debate. However, their governance structure is more akin to a meritocracy - prospective leaders are required to demonstrate their potential to lead through a mixture of attaining required qualifications and through demonstrable life experience which illustrates their ability to make good decisions. Leaders are then appointed on this basis. On Earth, we only seem to be able to understand two systems of governance - democratic rule or authoritarian rule, with each system having its own serious weaknesses. At first glance, the Plejaren governance model appears radically different to the western democratic-based system we currently know, but following inspection it can be seen as much more advanced and beneficial than ours to the society that it supports.

Q3 - What do you consider to be the coolest Plejaren technological development and why?

Answer

Beamship. I think this partially stems from a love of cars and the enjoyment that can be obtained from walking around an exhibition such as the Jaguar heritage museum - can you imagine what it would be like to walk around the Plejaren beamship museum? To use base vernacular - it would just be spaceship porn. However, I think there is also another factor here that makes for me, beamships so appealing. At the end of the day, technological gadgets are just tools. The question therefore arises, if you were in possession of such a tool what would you do with it? Beamships to me represent freedom, they represent the capability to fly amongst the stars. One of my dreams is to be able to view the Earth from Earth orbit, an experience that all our Earth astronauts have said is deeply spiritual and has enhanced their emotional connection with the universe and our home planet. Beamships allow you to do that.

Q4 - If your home was burning down and you only had time to save one of Billy's books, which one would it be and why?

Answer

"The Might of the thoughts." It was the first of Billy's books I read and introduced the concept of your consciousness working on three levels: your everyday consciousness, your inner self and your inner creational self. It was the first book that to me adequately started to explain what I was experiencing in my life and the way these three levels interplay, impact and influence the circumstances of your life.

Q5 - How have you applied the creation-energy teaching in your everyday life?

Answer

For me, the primary application of the creation-energy teaching has been to achieve the objective of the harmonisation of my psyche into a neutral-positive-equalised balance (currently a work in progress). Due to the way your consciousness interacts with your body, your ongoing relationships and the overall direction and course of your life the impact is without exaggeration, life changing.

Q6 - Which part of the creation-energy teaching has brought you the most comfort?

Answer

That's an excellent question because potentially in the short-term it doesn't. Adopting the creation-energy teaching as a basis for your life and striving to evolve your consciousness means taking true responsibility for who you are, where you're at and where you're going. This can be very, very difficult particularly if you've spent your life blaming others for your own misfortunes and is potentially the biggest stumbling block for Earth humanity moving forward with their lives right now. For me personally, adoption of the creation-energy teaching has been a balance, it has brought reward, but those rewards have been balanced by incredibly hard work. The reward for following the creation-energy teaching is potentially best considered on a more long-term basis as after approximately three re-incarnations of the spirit form the rewards are felt more as they begin to increase exponentially.

Q7 - In which way has the Creation-energy Teaching had the biggest impact on you?

Answer

Helping me to understand my psyche, it's importance and how the harmonisation of your thought processes into a neutral, positive, equalised balance changes your life.

Q8 - What motivated your interest in the Billy Meier/FIGU/the Creation-energy Teaching?

Answer

At an early age I could sense the imbalance in my psyche as I could see the impact it was having and causing in my life, but I didn't have the words to communicate the problem or any frame of reference upon which I could discuss what I was struggling with. That initiated a life journey of exploration and learning that ultimately led me to the creation-energy teaching.

MEMBER INTERVIEW - Aleksander P.

Q1 - If you could time travel what would you want to say to the most recent previous incarnation of your spirit form and / or to your immediate next future incarnation? As an accomplished time traveller, you can pick any age of their life to visit (and assume a timeline where no mishaps have unnaturally shortened their life).

Answer

Having a choice, I would probably not want to speak with the previous personality of my Creation Energy form, as the past cannot be changed, but just observe who he/she was and what if anything he/she had achieved evolutionary wise.

With regards to the next personality enlivened by my Creation Energy form, again I would feel a reluctance to interfere with any natural evolutionary development and fear that a proselytization could occur that might inhibit this, it has become very apparent to me that it is a personal responsibility for each personality to find their own path to the truth in their own time and way, I can only think of my present situation and the fact that it took me 52 years to find and realise the truth and reality that is the teaching of life, teaching of Creation Energy, teaching of truth, having made numerous errors along my own life path I know this has helped rather than hindered my development, as it has afforded me the ability to reflect on and work towards becoming a better human being.

Having said all this, I could be tempted to leave a FIGU pamphlet or two where there is a high probability that the next personality could find them!!!!

Q2 - What do you find most interesting about the Plejaren and their culture and why?

Answer

The fact that they have reached a high state of human evolution through their combined efforts and not only live in peace and harmony amongst themselves but have incorporated their high values to many other planets in their Ankar Universe that are now part of a federation. No war, no crime, no overpopulation, no exploitation, wouldn't that be nice to achieve here!!!

Q3 - What do you consider to be the coolest Plejaren technological development and why?

Answer

Without a doubt it would have to be their ability to open Time Gates, which are high-energetically produced passages from one place to another, no matter how far apart and even to parallel universes. You could just open a door and instantaneously walk onto another planet teeming with natural life and abundant beauty for a well-earned meditation!!!

Q4 - If your home was burning down and you only had time to save one of Billy's books, which one would it be and why?

Answer

For me it would be The Goblet of Truth as the last and definitive teaching of truth, teaching of Creation Energy, teaching of life for the benefit of all consciously aware lifeforms in the entire Universes of our Creation.

The fact that this wonderful tome is the original teaching of Nokodemion and billions of years old, but also contains the teachings of Henoah, Elia, Jesaja, Jeremia, Jmmanuel, Mohammed and now Eduard Albert Meier and the approximately 11,000-year mission of these Truth Proclaimers.

Although all of Billy's books are deeply insightful, I felt this one had the most profound and evolutionary effect on my psyche.

Q5 - How have you applied the creation-energy teaching in your everyday life?

Answer

Every day I make an effort to observe nature and process some part of the astoundingly large and still increasing teachings brought to the Universe by Eduard Albert Meier. I always find time no matter where I am to meditate and endeavour to bring myself into balance with the Universal consciousness (I have probably missed about 10 days over the last 8 years) and always try to review my day in my material conscious, especially with regards to any human interaction in order to realise any mistakes and endeavour to constantly improve on my neutral equalised positive thought processes.

Q6 - Which part of the creation-energy teaching has brought you the most comfort?

Answer

The realisation that working towards improving my own evolution not only helps this personality but the environment, other humans, future personalities enlivened by the Creation Life Energy and overall consciousness block, and most importantly the evolution of our Creation, Nature, the Universal Consciousness.

Q7 - In which way has the Creation-energy Teaching had the biggest impact on you?

Answer

It has completely changed my life path and my way of thinking and self-control.

Q8 - What motivated your interest in the Billy Meier/FIGU/the Creation-energy Teaching?

Answer

I always thought there had to be more to our existence than what was on offer by any of the past or current ideological and philosophical information that has been produced by Earth humans, until through my own efforts of searching and researching I came across the teachings of Eduard Albert Meier, which provided me with all the motivation I need to live the truthfully reality until the Grim Reaper knocks on my door.

MEMBER INTERVIEW - Yunal Berk

Q1 - If you could time travel what would you want to say to the most recent previous incarnation of your spirit form and / or to your immediate next future incarnation? As an accomplished time traveller, you can pick any age of their life to visit (and assume a timeline where no mishaps have unnaturally shortened their life).

Answer

It sounds very interesting and tempting to know which previous personality my spirit form resided in or which personality it will enliven next. I don't think I would want to know this. Rather, I would want to clarify some interesting facts, to learn something from the past and future for the benefit of my current personality. I live in here and now, and what matters is to learn as much as possible about the creation energy teaching and creational natural laws and recommendations as Yunal Berk.

Q2 - What do you find most interesting about the Plejaren and their culture and why?

Answer

The way how they live in Harmony, peace, creational natural laws. The respect for human beings across the Universe. The constant strives to learn more and evolve consciously. When reading Billy's books, it seems they live a very homogenous life. Who knows, one of my not-so-distant incarnations might meet some of the Plejaren people in the future 😊

Q3 - What do you consider to be the coolest Plejaren technological development and why?

Answer

Somehow Quetzal's Land Rover (not sure about the name, it was a model from the 70'ies I think.) comes into my mind which he took as souvenir from Earth, I think. What fascinates me, he transformed the vehicle into a quiet and eco friendly machine and enjoys driving it. It must be amazing to know that you drive something from another world on your home planet 😊

Q4 - If your home was burning down and you only had time to save one of Billy's books, which one would it be and why?

Answer

Any of Billy's books really. I would try to save more of course if I can.

Q5 - How have you applied the creation-energy teaching in your everyday life?

Answer

Observation, patience, listening to classical music, meditation, concentration exercises, observing nature, reflecting on my thoughts. Overall, I endeavour to constantly improve on my neutral equalised positive thought processes. I try to become a better human being by implementing all the valuable information which Billy brought to us in a new, understandable form.

Q6 - Which part of the creation-energy teaching has brought you the most comfort?

Answer

Alles ist eins - All is one!

Q7 - In which way has the Creation-energy Teaching had the biggest impact on you?

Answer

I don't think I can even fathom the immense help I get through Billy's teachings. People usually say I am mostly a positive-bubbly personality. It is always good to know about the Negative and Positive and the fact that they form a Neutral form, a form of Neutrality and neutral equalised positive thought process.

Q8 - What motivated your interest in the Billy Meier/FIGU/the Creation-energy Teaching?

Answer

In the beginning it was the UFO's and the Aliens. It turned out it was just apparatus to get from point A to point B. The so-called Aliens turned out to be human beings like us - The Plejaren. Then I wanted to know why they are here, why they want to speak to Eduard Albert Meier. Then I realized there was more to this. I discovered the Geisteslehre or Creation-Energy Teaching. I continue to learn how to become a better human being. I just want to use this opportunity and say big thank you to Billy and the Plejaren and everyone in the Plejaren Federation for helping us.

Salome

Yunal

MEMBER INTERVIEW - Karl Beaney

Q1 - If you could time travel what would you want to say to the most recent previous incarnation of your spirit form and / or to your immediate next future incarnation? As an accomplished time traveller you can pick any age of their life to visit (and assume a timeline where no mishaps have unnaturally shortened their life).

Answer - If I could travel to the future and speak with my next personality I would visit them at about 18-21 years old and tell them what is important in life (consciousness-based evolution/ learning), where to put one's energy and attention and what not to get too distracted by (materialism/money/work/affective love).

Q2 - What do you find most interesting about the Plejaren and their culture and why?

Answer - I don't really feel like I know that much about the Plejaren and their culture. From reading the Contact Reports I have a brief grasp of some things about them, so from what little I think I know I would say I find their knowledge/general overall evolution most interesting and what they are able to do with that resulting knowledge. If I have to be specific, I find the fact that they live in peace with themselves, with one another and nature most interesting.

Q3 - What do you consider to be the coolest Plejaren technological development and why?

Answer - Either space and time travel or their vast knowledge about health, the human being/ body and the resulting science & medicine.

Q4 - If your home was burning down and you only had time to save one of Billy's books, which one would it be and why?

Answer - That's a mean question. For the sake of nostalgia it would have to be "Einführung in die Meditation". I bought that book on my first visit to SSSC, I couldn't read or speak German but I had to have that book. I started translating it word by word, eventually by doing that and having some proper German lessons I learned to read Billy's books. It was that book that made me learn German and now I can read Billy's writings (with the aid of a German/English dictionary of course). I would like to add though that each time I read one of Billy's books, no matter which one it is, I am flattened by not only the treasure/knowledge within but how each book is different, not only in content but in the writing style and feel. Truly amazing.

Q5 - How have you applied the creation-energy teaching in your everyday life?

Answer - Little by little over the years. At first I had to think about the answer to your question but if I compare my life now to before coming across the FIGU it is massively different. And that is all down to the Creation-energy teaching, no doubt. If I broke it down and listed the things I can think of, or notable things that I have changed, it would be a very long answer. In short I have implemented things that I deem beneficial to me and my life, if it has worked or brought me a positive result I stick with it, but it is all from the Creation-energy teaching.

Q6 - Which part of the creation-energy teaching has brought you the most comfort?

Answer - I wasn't really looking for comfort and I haven't considered it from that angle but I get where the question is coming from or going. I think just knowing about why the human being lives and knowing about the process of life/death/incarnation etc. brings one's life massive advantages and therefore comfort.

Q7 - In which way has the Creation-energy Teaching had the biggest impact on you?

Answer - It has totally changed my thinking and priorities. As a result my life has changed a great deal, and for the better. I am happier, healthier, feel more confident, more relaxed, more free. I enjoy things which I didn't really care about before, like nature and the outdoors. To me, it's not really one big change, it is the accumulation of many small changes that adds up to a massive shift/change/impact.

Q8 - What motivated your interest in the Billy Meier/FIGU/the Creation-energy Teaching?

Answer - Initially it was curiosity, then once I couldn't find holes in the material and couldn't pick it apart with logic and questions I knew it was real. Since that moment it is the truth and the realisation of the truth (along

with the cognitions, experience, practical application and knowledge/ wisdom resulting from that) that motivates me.

MEMBER INTERVIEW - Keith Davidson

Q1 - If you could time travel what would you want to say to the most recent previous incarnation of your spirit form and/or to your immediate future incarnation? As an accomplished time traveller you can pick any age of their life to visit (and assume a timeline where no mishaps have unnaturally shortened their life)

Answer

I would take a short temporal hop to my next incarnation and have a chat with that personality at reasonably young age. I would encourage that personality to seek the truth through thorough examination of reality and stress the importance of the Creative-energy Teaching in finding Love, Peace, Freedom & Harmony in all aspects of my everyday life.

Q2 - What do you find the most interesting about the Plejaren and their culture and why?

Answer

I really admire their pursuit of truth, consciousness evolution and genuine democracy. Everybody's opinion matters and is taken on board. I compare this to the Earthly way of living, pursuit of materialism and tribal politics. It seems so regressive in comparison and just highlights how far we have to grow as human beings to make the world and ourselves a better on both the outside and within.

Q3 - What do you consider the coolest Plejaren technological development and why?

Answer

Definitely time & space travel. Every since I was a child, I have loved sci-fi and, especially, Doctor Who! I find the concept of time travel fascinating as well as its laws and guidelines. As youngsters, we Earthlings have envisaged time travel in films like Back to the Future where we travel back to the past and 'fix' wrongdoing or improve our circumstances. The truth of the matter is, of course, altogether different. The past is the past albeit capable of being visited but not changed. In relation to space travel, I am always minded of what Q said to Captain Picard in Star Trek, 'It is not safe out here. It's wondrous, with treasures to satiate desires both subtle and gross. But it is not for the timid'.

Q4 - If your home was burning down and only had time to save one of Billy's books, which one would it be and why?

Answer

I would grab 'The Way to Live'. It is a manual to everyday life and is stuffed full of great advice and guidance. You can dip in and out of any section of that book and find golden nuggets wherever you land on the page. Further, it is very accessible and easy to read. I think it is one of the most important items in Eduard's vast array of books, articles and bulletins.

Q5 - How have you applied the creation-energy teaching in your everyday life?

Answer

Personally, I have sought to bring balance to my thoughts and actions. The four cornerstones of Eduard's teaching are Love, Peace, Freedom and Harmony. I seek all of these values in my inner world and then manifest them in my outer. Professionally, as a farmer, this I have made major changes to how we farm with a much stronger focus on supporting nature, flora and fauna.

Q6 - Which part of the Creation-energy Teaching has brought you the most comfort?

Answer

Definitely understanding the principle and process of reincarnation. This has led to a more explorative examination of what it means to die, learn and be reincarnated as a completely new personality. Hopefully, with a more evolved Creation-energy part piece attached to the new personality! It has removed any fear I have of death and makes life more of a celebration of Creation's constant drive to diversify and grow.

Q7 - In which way has the Creation-energy Teaching had the biggest impact on you?

Answer

On a personal level, I am more at peace with myself. In a large part this comes from focusing not on what I may have done wrong in the past but the learning I have taken from it. I seek balance in every thing I do and strive to be better. As with nature, as with life, everything must grow.

Q8 - What motivated your interest in the Billy Meier/FIGU/the Creation-energy Teaching?

Answer

Simply, I felt unfilled in my life as it was and set out to find a higher truth. This journey brought me to the Creation-energy Teaching after several years of searching. Ironically, I first came across it by reading and watching videos from sceptics trying to debunk it. Everything I have read since, resonates with me as being true and chimes with my lived experience.

Farming in line with the Creation-energy Teaching

By Keith Davidson

Overview of the farming operation

I own and operate a 85 hectare arable farm in the North East of England. It has been in family ownership for over a century and I am now the fourth generation to farm it. When I first came across the Creative-energy Teaching, I largely focused on developing my inner world. As it has been some years now since I first encountered it, I have been making substantial changes to my outer world and, inevitably, my farming operation.

Current challenges

Farming is often in the news and is undergoing seismic change due to climate change, volatile geopolitics, Government taxation and subsidy policy and a multitude of competing land interests.

Climate upheaval remains one of the biggest challenges we have to face. It has significantly affected profit for the last three consecutive years with harvest yields down as a result of poor establishment due to wet weather and intensely dry periods affecting crop development. As a result, in order to mitigate the risk, we have reduced the cropped area by half and replaced it by planting nectar and pollen rich grasses and flowers in support of nature recovery. In line with Eduard's teaching, we strive to provide a home for nature as much as growing food. I have an apiary at the farm and over 300,000 of our bees are thriving due to these changes I have made. It is one of the best indicators of balanced on-farm biodiversity.

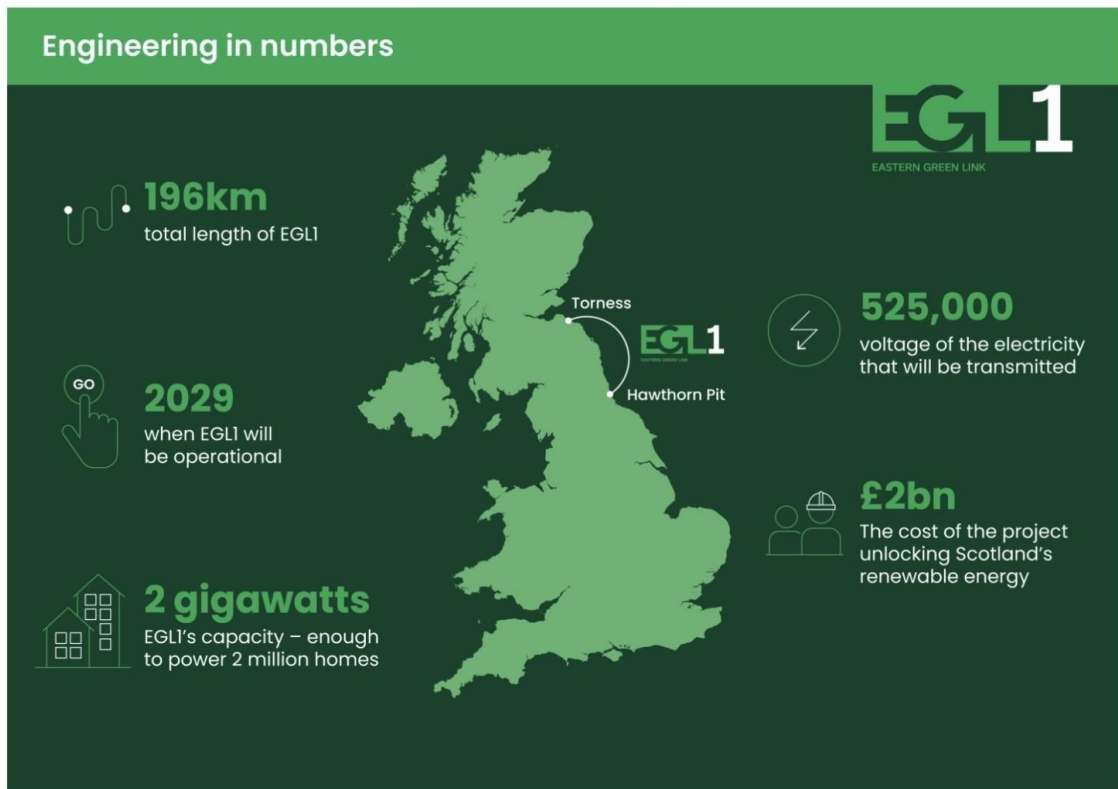

The volatile nature of current geopolitics has had a dramatic effect on both our input and output prices. Farmers are price takers, not price makers. All major prices are set on the global market so when Putin invaded Ukraine, my fertiliser price tripled due to its production being a gas-hungry process. Last year, the UK experienced one of its worst harvests on record. However, this has not been the case globally so wheat prices have continued to tumble settling marginally above break-even. There was very little margin within arable farming to begin with so any downturn in the selling price immediately wipes out profit and most likely creates a loss. Added to this are changes to Inheritance Tax policy and subsidy reduction making it harder than ever for farmers to operate profitably. More recently, America's war with Iran has caused fuel and fertilizer prices to soar. This is heaping even more financial pressure on farmers aside from the climate upheaval. However, in line with the law of harmony, I have sought to widely diversify to ensure the business is not unbalanced by focusing on one major activity.

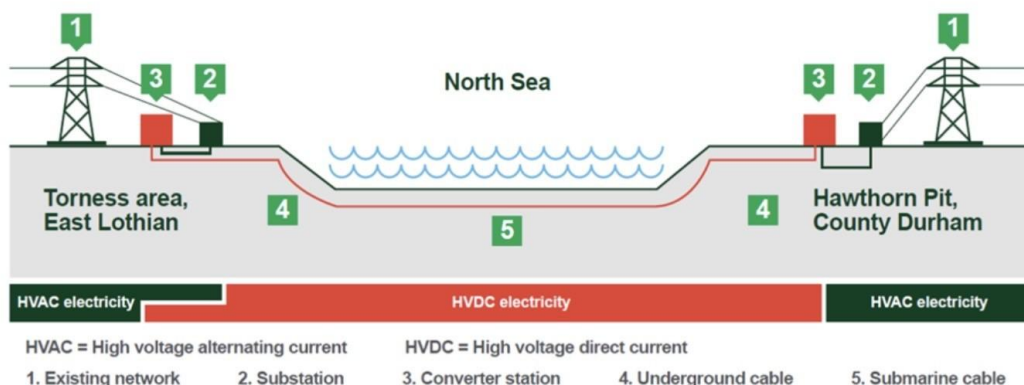

Balanced Diversification

Landowners like myself are under constant bombardment from a wide range of competing land interests. These range from clean energy, critical national infrastructure, nature recovery, food security and housing amongst others. In order to stabilise the arable operation, we have chosen a number of these interests to bring a more balanced approach.

Right now, the biggest project happening on my farm is in support of the UK Government’s drive to reach Net Zero by 2050. Working alongside the English & Scottish Governments, my farm is at the epicentre of the Eastern Green Link 1 Project (EGL1). EGL1 aims to bring 2GW of offshore wind from Scotland to the England via a 196km subsea and onshore underground HVDC cable. This £2 billion pound project will bring enough clean energy to power 2 million homes. At the farm, we are hosting the National Grid’s 4 hectare Main Works Compound until 2029. You can see how the project works from this diagram below.

How EGL1 will work

For more information, visit: www.easterngreenlink1.co.uk

Homegrown Clean Energy

Building on the work we are already doing with National Grid's EGL1 project, we are also seeking to home grow 49MW of clean power via a solar farm. We currently have a planning application pending for a 80 hectare solar farm in partnership with my extended family who farm opposite. If successful, this will avoid 14,000 tonnes of carbon being added to the atmosphere every year. The soil quality at my farm is not very high due to the high boulder clay content. However, we have been investing heavily into soil health over the years but the best crops we can produce will only ever go for animal feed. Therefore, there is very little impact to food security by adding solar panels to the land. You can see the layout of the proposed solar farm below.

Nature Recovery

In tandem with the clean energy projects, I also focus heavily on nature recovery. Intensive food production is based on the development of monocultures often at the expense of nature. By rebalancing our focus to include nature recovery, we avoid the catastrophic loss of habitat and resources available to all flora and fauna. Over half the farm is now dedicated to a range of nature friendly prescriptions including nectar and pollen rich grass, wild bird seed feeding areas, bumble bee mix flowers and clovers, floristically enhanced field margins and an ancient woodland. Out of all the things I do on the farm, I get the greatest pleasure from observing all the life that comes to farm since we undertook these measures. This brings me much love, peace, freedom and harmony. You can see an example of our legume fallow nectar and pollen rich grass below which now covers over 40 hectares of my land and is teeming with life.

These are just a few examples of the things I have done in line with the Creative-energy Teaching to bring balance to my inner and outer worlds. It's very much work in progress and I continue to strive to improve both as a human being and as a landowner. Discovering the Creative-energy Teaching has brought so much pleasure to my life and life to my farm. I would like to thank Eduard personally and FIGU for their continuing dedication to the ongoing Mission.
